Wetland Fill/Excavation at The Canyons - Pitts Road

dredge silt from embayments within 7 lakes at the Fairfield Glade Community Club

conduct instream commercial gravel mining

The applicant proposes to upgrade the sewer systems of Portland, TN with 7,000 linear feet of new sewer lines. The City

Instream Commercial Gravel Mining at Jennings Creek

Fill of 0.83 acres of wetland and encapsulation of 340 linear feet of a conveyance.

Encapsulate and relocate three streams and fill two wetlands along and near the taxiway and Airport Road to allow for the Stream and wetland alterations

proposed off stream pond and stream relocation

Goodwin Road Extension for Road Crossings, Stream/Wetland Restoration and Wetland Fill/Excavation at Unnamed Tributary

Commercial Gravel Dredging at two sites along Dry Creek

The Shoppes at Blountville - Wetland Fill/Excavation

proposes to install an 8' x 14', 3-sided box culvert over an unnamed tributary to Arrington Creek

Project #24001-1144-44 PIN #105597.00 I-40 Construct New Interchange at SR196

485 linear feet of rip rap bank stabilization

the applicant proposes to relocate and widen 1,578 linear feet of Northwoods Branch. The activity will consist of shifting the placement of fill in 1,355 feet of channel previously authorized under NRS 04.299; additionally relocate 330 feet of an unnamed stream and install road crossings and fill wetland

Dyer County Little Levee Repair

replace eight wing walls along two unnamed tributaries at their confluence with Mill Creek at State Asylum Road (McGav) and dredging of accumulated gravel for farm use

Wetland and Stream Fill/Excavation at Unnamed Tributaries

proposes to construct an arched bridge over Owl Creek, install a sanitary sewer line via bore under Edmonson Branch, an access Lauching Ramp and Bank Stabilization at Lakeshore Recreation Project Phase II - Lakeshore Drive near Kingston Fossil Plant. install articulated concrete mat

improve a stream channel

Barrier Properties proposes to cross Roger's Branch 7 times and fill approximately 0.085 acres of wetland installing sanitary low water crossing

encapsulate 290' of stream

encapsulate two unnamed tributaries to Ails Branch (110 linear feet and 120 linear feet of 36" CMP) and mitigate for two wetlands. Project #40116-1211-14 PIN #112528.00 SR218 Road Crossing and Wetlands Fill/Excavation Northwest of Paris to SR54 (US 421) Fill of approximately 1.49 acres of wetland for residential development.

commercial instream gravel mining

proposes to culvert 100 linear feet of stream with a 4 x 8, 3-sided box culvert and install gas, water, sewer and other utilities. mine gravel

mine gravel

excavation of approximately 1,500 cubic yards of sediment over 1,300 linear feet of an unnamed tributary to Black Branch. placement of fill in 1.00 acre of wetland and encapsulation of 115 feet of perennial stream for a road crossing

Re-slope eroded streambank, install hard armoring along 429 linear feet of Hurricane Creek, install in-stream rock jetties

The applicant is proposing to rock riprap approximately 1888 linear feet of the Holston River along the left descending bank. Stream encapsulation for storm water retention structure and parking lot.

proposes to install two utility lines; trenches will be cut via rock hammer. The width of each crossing will be less than 25 feet

Permanently impact 1.74 acres of wetland, temporarily impact 0.33 acres of wetlands, seven stream crossings resulting in the withdrawal of water from Buffalo River to create mud pits for an off-road vehicle park

 Sneedville Sewer System Improvements for Phase 2 and 3 of a 8" gravity sewer line crossing at Unnamed Trib to Greasy (C
 install 5 gravity sewer crossings of Grassy Creek and tributaries
 Project #06001-1171-44 PIN #112517.00 I-75 Interchange at Pleasant Grove Road and SR-311 (US-74) Culvert Extensions
 cross stream four times with gravity sewer line
 conduct navigation dredging at their facility within McKellar Lake.
 proposes to install a gravity sewer line and a water line which will each cross the stream twice
 fill 0.040 acres of wetland, encapsulate of 165 feet of stream, and install a utility crossing.
 Project #32006-1226-14 & #45009-1210-14 PIN #100248.00 - Stream Relocation - SR66 North of I-81 at SR 341 in Jefferso
 Project #06001-1171-44 PIN #112517.00 I-75 Interchange at Pleasant Grove Road and SR-311 (US-74) Culvert Extensions
 stream relocations, stream encapsulations, utility line installation across stream channels, rip rap placement with in stre
 culvert three streams, bridge two streams, fill six wetlands, one spring, and one stream
 Cumberland Fossil Plant Fly Ash and Gypsum Barge Loading Areas Dredging Project and Maintenance Activities at Cumbe
 Wetland Fill, Stream Relocations, Stream Encapsulation, and Utility Line Crossings
 Wetland Fill/Excavation at the Hillsboro 161-kV Transmission Line
 Proposed Kroger Shopping Center - Wetland Fill/Excavation Adjacent to Beaver Creek
 Dredge 1,000 cubic yards of material from the lake and install a floating dock.
 fishing pier construction
 PowerCom Industrial Center - Dredging at Cumberland River Mile 284.1
 install 21 V-Weirs and straighten 105 feet of a sharp turn and replace with 75 feet reach
 dam, reservoir, and water withdrawal
 Bear Creek Road Facility - Stream Encapsulation of Unnamed Trib
 Cumberland University Property Wetland Fill/Excavation
 renew an expired permit for commercial sand and gravel mining in Kentucky Reservoir
 Project #79003-1186-44 PIN #102240.00 I-40/I-240 East Memphis Interchange Phase II Stream Encapsulation and Wetland
 442 linear feet of rip rap streambank stabilization
 excavation of sediment and debris in 3 segments of Richland Creek
 to restore 10,125 feet of Stokes Creek by digging a pilot channel 12 feet wide and 3 feet deep along the main channel and
 construct 4 crossings of unnamed tributaries the McCrory Creek involving encapsulation of a total of 185 feet of stream a
 maintenance dredging at two sites near Looney Island with in river disposal of dredged material
 placement of fill in 1.2 acres of wetland
 Dredge river sediment from the navigation channel adjacent Post Oak Island (TRM 632.0 - 632.5) and place river sedimen
 the fill of a 0.92 acre pond and the alteration of three wet weather conveyances for Section 44 construction of the Westl

----------	-----------	-----------	-----------

construction of a work platform within Boone Lake, expansion of a construction area below normal summer pool elevation to construct a new middle school campus involving filling of 765' of an unnamed intermittent tributary to Scotts Creek, and construction of riprap revetment along approximately 1640 linear feet of shoreline; repair of access road that will be used for approximately 4,000 to 5,000 linear feet of streambank stabilization along Roan Creek and Town Creek

re-issuance of a permit that authorizes irrigation withdrawal at rate of approximately 0.22 cfs, water withdrawal would cease if creek flow falls below 3.5 cfs

excavate open cut access in surface waters to repair lateral sewer service lines at multiple points to be determined during construction

proposes to add a lane to the 440 exit ramp. This activity requires relocation of 185 linear feet of an unnamed tributary to the main channel of the river

Hydraulic dredge area about 300' x 35' maximum depth of about 7'. Dredged material to be pumped to and deposited within a designated area

PLACEMENT OF FILL IN A ROCK QUARRY

replace the existing 49 feet (33 feet wide) 10X6 box culvert with 51 feet (61 feet wide) of a three barrel 16X10 foot concrete box culvert

Stream Restoration and Sinkhole Repair.

Oostanaula Interceptor Rehab Sewer-Utility Line Project

1904 linear feet of rip rap stream bank stabilization

replace bridge over Duck River SR 106 Franklin Pike; proposes 460 ft two span bridge with rip-rap around the abutments

Project #49010-1215-14 PIN #101211.00 SR 208/209 Bridge Extension, Stream Reallocation, and Bank Stabilization at Caney Creek

Instream gravel mining

construct a 280 ft. long riprap revetment

re-issuance of a permit that authorizes irrigation withdrawal from Jones Creek at a rate of 350 gallons per minute (0.78 cfs)

Project #17010-1214-94 PIN #108893.00 SR 188 Replace Bridge over Overflow at LM 11.93 and 11.98

Irene Woods Senior Housing and Apartments Road Crossing at Nonconnah Creek with Stream Relocation and Wetland Restoration

enlarge the work pad in the reservoir by adding 25,000 cubic yards of rock

Construction of Sand Catch Basin and Dredging

Culvert replaces at two crossings of an unnamed tributary to Sims Branch.

Instream Gravel Mining

eliminate by filling approximately 304 linear feet of stream

excavate a private recreational pond

Instream Commercial Gravel Mining

filling and relocating 533 linear feet of existing

stream channel into approximately 320 linear feet of open channel and 185 linear feet of encapsulated channel

fill approximately 1.5 acres of wetland and restore approximately 3.7 acres of adjacent wetland

Drakes Creek Bridge Maintenance

Instream Commercial Gravel Mining

Roane Regional Business & Technical Park Distribution Facility

Sanders Creek Bank and Bottom Gradient Stabilization

Lateral J Drainage Improvements at Wolf River Bank Stabilization and Detention Pond

Project #27025-1404-94 PIN #103880.00 Replace Bridge on Baseline Road over Parker Branch at LM 12.11

Reconstruction of an outfall structure and riprap of short WWC and 8-10 linear feet of Harpeth with riprap.

Structure was damaged in 2010 flood.

Riverside Drive - Section 14 - Streambank Protection Project - 1650 ft of Shoreline Along the Cheatham Reservoir RB and

Construction of apartment complex with permanent impact to 0.49 acres of forested wetland and 451.3 linear feet of stream impacts.

400' of riprap revetment. Revetment would extend to bank full height for 275' and full bank for 175', with 35' planted rip 116 ft of stream relocation and 72 feet of culvert in Str-2 and 66 feet of encapsulation and 48 feet of rip rap in Str-1 to re stabilization of an additional 1,100 feet of streambank along the Tennessee River

44lf extension of stormwater outfall pipe and new headwall into stream buffer

Placemnt of fill in 1.1194 acres of wetland

perform periodic maintenance dredging with upland disposal

proposes to encapsulate three unnamed tributaries to Wright Branch for 242 linear feet, install a gravity sewer line cross placement of fill in 0.308 acres of isolated wetland

sediment and debris removal and hard armoring along culverts and roadside stream channels at 24 locations

repair approximately 700 feet of existing stone fill structure using graded Class C stone along McKellar Lake in Shelby Co

Stabilize 2,650 feet of shoreline with full bank rip rap along the Holston River - Cherokee Reservoir to protect coal ash pc

construct the Bordeaux Dock at the Marathon Petroleum Company consisting of a fixed walkway to a floating dock struct fill 0.267 acres of wetlands to allow a vehicle ingress/egress from the highway to a Burger King restaurant.

reauthorize the individual permit NRS10.191 for stream relocation and culvert extension for the widening of SR62

construction of notches, ranging from 75 feet to 150 feet wide in nine existing rock dikes located within the Mississippi R is proposing to extend a State Industrial Access (SIA) Road and will impact three separate streams totaling 194 linear feet Stream restoration and wetland alterations associated with mining areas previously disturbed by mining.

1500' linear feet of riprap bank stabilization to protect significant archaeological resources in Watts Bar Reservoir

proposes to replace 4 road crossings along Rogers Branch and an unnamed tributary to Rogers Branch. Each crossing is u

Repair dam and dredge pond impoundment of Mill Creek

Emergency remedial measures to temporarily plug sinkholes

2200 ffet of bank stabilization, 2200 cubic yards of dredging, dock construction, 10 mooring dolphins

construct two 58 foot slab bridges with and 140 feet of riprap stabilization at each crossing over Mill Creek along the Mc reconstruct and stabilize 1500 feet of the west bank of the Caney Fork River to repair a slide along SR 141

Stream Restoration and Sinkhole Repair

fill 0.01 acres of low resource value wetlands and encapsulate 250 linear feet of stream in order to build a new FedEx dist

420 feet of half bank riprap revetment with willow staking

residential development with 213 feet of stream relocation and 84 feet of stream loss

Excavation and tree removal on bank of Nonconnah Creek

The Tennessee Department of Transportation proposes to impact eight streams and twelve wetlands from State Route 2.

Earl Brent Hill proposes to install a 12-foot by 15-foot cement boat ramp and up to 30 feet of rip rap on the Caney Fork River in Lancaster (Smith County).

The Tennessee Department of Transportation proposes to conduct maintenance repairs to four bridges near Troy along S

Placement of fill in 0.14 acres of wetland

The work includes installation of anchors, construction of an interior wall, excavation of approximately 98,000 cubic yard to widen and realign 0.73 miles of Bennett Road in Putnam County with 47 feet of encapsulation, 30 feet of stream loss, fill 0.13 acres of wetland for lot development and encapsulate 2 tributaries to the Harpeth River. Crossings are a 30" pipe to widen 1.27 miles of SR-109 involving impacts to 0.103 acre of wetland and 469 feet of impacts to streams

Pipeline crossing of Mississippi River, McKellar Lake, Harbor Channel and temporary impacts to 1.23 acres of wetland

Placement of Fill in 1.0 Acres of Wetland

replace two existing wooden trestle bridges over unnamed tributaries to the Hatchie River with steel and install a permanent

Placement of Fill in 0.27 Acres of Wetland

boat channel dredging and discharge of the dredged material via jet spray

Encapsulate, remove, and relocate 3991 lf of streams, wwc and springs and relocate utility lines at 8 stream locations and build a new Student Center on the university campus. This proposal will daylight 146 linear feet of an unnamed tributary. Recreational Prospecting using hand tools and mechanical devices.

UNLOADING DOCK MAINTENANCE DREDGING. APPROXIMATE AREA 300' X 60' X 13'

replace existing 505 linear foot culvert with a 136 linear foot culvert and daylight 330 linear feet of stream. Additional work replace the existing Sr-76 bridge over the Hatchie River involving permanent fill of 1.65 acre of wetlands

Fill 0.27 acres of low resource value wetland and encapsulate 116 linear feet of a wet weather conveyance to install an access and construct 390 linear feet of riprap revetment up to one half the bank height

construct half-bank riprap revetment along a total of about 400 feet at two sites on the applicant's property

Upgrade of Collegedale Basin Pump Station and the replacement of approximately 1700 linear feet of an existing 16 inch pipe to construct a 23.25 mile 8 inch natural gas pipeline in a 25 foot right of way crossing 37 streams

removal of the 8th Street bridge, removal and replacement of Wes Davis greenway pedestrian bridge and construction of SR 115 Intersection Improvement at SR 333 (Topside Road) at Unnamed Tributary (STR-1)

cross 9 streams, 7 wet weather conveyances, and 2 wetlands to for the installation and/or rehabilitation of the sewer line replacement of barge dolphins and dredge of accumulated sediment between barge tie up and shore

see 15.030A and 15.030B

Fill 0.60 acre isolated wetland to install 4 lots and an access road in a proposed subdivision

withdraw a maximum of 14.4 million gallons per day from the Hiwassee River at River Mile 16.7

bank stabilization along Turkey creek consisting of 615 feet of bioengineering and 455 feet of riprap placed to bankfull the creek. Construct 4000 linear feet of 24 inch gravity sewer and lateral lines parallel to East Branch Hurricane Creek to replace and widen SR-128 including 0.03 acres of permanent wetland impact and 313 ft. of culvert extensions in unnamed tributary to the river. Installation of a 244-foot culvert and placement of 73 feet of riprap along an unnamed tributary to Drakes Creek.

install two road crossings and three utility line crossings. The road crossings will impact 95 linear feet of stream. Propose to fill 0.50 acres of wetland for Nissan Get Ready parking/carwash.

placement of fill in 0.6 acres of wetlands

dredge approximately 300 cubic yards of gravel from an existing bar for use on farm roads and around barns

to implement a stream rehabilitation project on approximately 1,500 linear feet of an unnamed tributary to South Chickasaw River. Fill 1.24 acre of wetland and 705 ft. of stream encapsulation in support of the extension of SR150

Construct 3.6 miles of SR 397. This activity will cumulatively impact 1,434 linear feet of stream and 0.517 acres of wetland. Polestar Development Proposed Grocery Anchor #57505 at Man-made Ditch with Intermittent Stream Characteristics

DAM REMOVAL

Fill 1.62 acres of wetlands and culvert 583 linear feet of intermittent stream to construct a new TDOT Region II headquarters

Replace Existing Cofferdam on RDB of West Prong of the Little Pigeon River

restore 11,000 feet of a previously relocated and channelized tributary to Running Reelfoot Bayou.

Widen SR-63 From 2-LN to 5-LN From Campbell County Line to Hall Lane

Upgrade to currently used area boat ramp

South Harpeth Road bridge replacement over Brush Creek LM1.27

perform annual maintenance dredging of the harbor via a combination of hydraulic dredging, clamshell dredging or drag

Mitigation bank restoration

NRCS-designed bank stabilization: 330 feet of half bank rip rap with soil bioengineering, 50 feet of full bank rip rap, with

Construction of commercial property approximately 5000 sq. ft in size to include parking lot, access road, and utilities.

Streambank Stabilization

Channel Dredge, Bear Creek Cove to Pickwick

I-65 (S.B. & N.B.) at L.M. 8.90 (Rockfall Mitigation)

130' of streambank stabilization to prevent further bank erosion and to prevent undercutting of the adjacent road and cu

Installation of approximately 6475 feet of 18", 165 feet of 12", and 242 feet of 6" new gravity sewer main parallel to and

relocate gravity sewer by auger bore with 3 new manholes and 1 replacement manhole

Gravel removal from a gravel bar above the water line with a 4ft gravel buffer along the water edge

Dog Creek in Cove Lake State Park, Stream Mitigation

TDOT is proposing to widen SR-63 from near Frontier Road/Woodson Lane to near Claiborne County Line

Richland Country Club proposes to discharge 0.045 acres of fill along 130 linear feet of shoreline on a 0.24-acre open-wat

restoration of approximately 20,106 linear feet of streams and wet weather conveyances and preservation of an additior

Nashville District (Corps) proposes to dredge a Corps owned boat ramp in Dover, TN.

construction of a work platform within Boone Lake, expansion of a construction area below normal summer pool elevation
Mitigation bank

Stabilize banks adjacent to South Holston Labyrinth Weir to prevent further erosion of the banks

The alteration of 3.94 acres of wetlands associated with the development of a distribution facility

Unavoidable impacts to 0.50 acres of wetlands to construct a residential subdivision on a 9 acre site.

routine annual maintenance dredging of the Northwest Tennessee Harbor to maintain channel low flow channel dimensions

Wetland impacts associated with construction of a new apartment complex

Permanent repair of the roadway and slide area along S.R. 59

Commercial development proposed, Hwy. 394 between Blountville and Bristol TN. Fill of <.5 acre frontage portion of 1.3

Stormwater outfall relocation and removal of headwall, 80 ft. road crossing, floodplain re-establishment through grading

Development of 8 Senior Living Homes

Applicant proposes to construct a new manufacturing facility that will require the unavoidable impacts to 1.78 acres of is State industrial access road serving project haven (Pyramex)

Permanent impacts (fill) to 0.73 acres of wetland and on-site permittee-responsible mitigation associated with section 2

The Eastern Band of Cherokee Indians propose to install 2,220 linear feet of vegetated riprap and 1,050 linear feet of veg

Residential Development

Install 12" natural gas line to increase supply to the Cumberland County area. 25 crossings total that will include temporary

repair of 275 feet of a gabion wall by installing a structural foundation and replacement of 285 feet of a riprap revetment

Construction of a permanent access road to assess and repair an existing sewer line, resulting in impacts to 0.90 acres of

Restoration and preservation of 10,665 linear feet of streams, as well as 47 acres of wetland restoration for a Mitigation

Raw Water intake line relocation adjacent to the Pickwick Dam within the Pickwick Reservoir

Reestablish creek bank to prevent further erosion

0.13 acres of permanent wetland impacts associated with Phase 2 and 3 of a residential subdivision, bringing total cumulative

Proposing the repair of an anomaly on a natural gas pipeline span

Total proposed treatment length is 429ft. Site 1 is 50ft, Site 2 is 172ft., Site 3 is 88ft., Site 4 is 119ft.

Newport Springs Bottling, LLC, a subsidiary of Eternal Brands, Inc., proposes unavoidable impacts to an unnamed tributary

Bridge replacement to address needs and to improve stability while meeting TDOT standards with proposed channel relocation
Approximately 20 acre in lieu fee wetland mitigation project

A warehouse is proposed for the site, impacting 0.73 acres of wetlands and 1.3 acres of ponds.

Proposes the installation of approx. 9000 linear feet of 30" ductile iron transmission main cross-country in Williamson County

Construct 1.649 miles of the Hatten Track Road extension from SR109 to Dobbins Pike including 612 feet of new bridge on three segments of riprap armoring to top of bank totaling 645 feet, including four rock jetties at point of impact 1

Reconstruction and widening of State Route 136 from SR-111 to I-40

Mitigation Bank

Temporary encapsulation of 416 linear feet of a tributary to Cave Cove Branch (Stream 3) with a 24-inch diameter pipe in

Installation of new HDPE Gas Main. and Sludge return line to WWTP

Combines impacts from this and 21.026.

Replace rip rap with a stacked concrete block sea wall at Chris Chandler residence (181 feet of shoreline) for shoreline stabilization

Replace rip rap with a stacked concrete block sea wall at Bruce Hartmann residence (185 feet of shoreline) for shoreline stabilization

stabilize 1,880 linear feet of the Wolf River Harbor and install a 500 linear foot wide canoe access. Materials used will be hard armor

960 linear feet of the Holston River. The riparian area will be revegetated with native trees and shrubs above

JEA Substation - Bank Stabilization at Moize Creek

Interstate 640 and US441/SR33 intersection upgrades with 95 feet of stream impact and 2,820 feet of streambank stabilization install hard points consisting of sheet piling with rock scour protection at four points along an unnamed tributary to Gray Fill 0.38 acre wetland adjacent to Grassy Branch for planned residential development.

42" X 32' walkway and 8x10' pier

Project #18038-1230-04 PIN #100268.03 - SR 101 Peavine Road from East of Westchester Drive and Catoosa Boulevard - 1
embankment repair on pond/lake

dredging about 2500 cubic yards of shoreline for navigation draft for new marina

construct a new interchange from I40 to Mine Lick Creek road involving impacts to four unnamed tributaries to Cane Creek

Replacement of approximately 4300 feet of existing natural gas pipeline. Will include 5 stream crossings and 3 wetland crossings

Construction of a SIA road serving Clarkrange Regional Business Park with 0.383 acres of wetland impact and 84 feet of stream impact

Construction of a 1.55-acre gravel trailer parking lot with 0.30 acre of wetland impact and impact to two wet weather corridors
extend an existing 8X5.5 culvert in an unnamed tributary to McCutcheon Creek under Highway 31 by 408' of 6X10 box culvert

construction of 2 50' slab bridges and 2 utility line crossings of Pratt Creek

Pebble Isle Marina - Construct New Boat Slips, Dredge Approximately 3600 (modified to 4500) cubic yards of Silt from Harbor
Fill 1.58 acres of wetland and encapsulate 160 linear feet of a channelized spring drainage within the wetland for a residence

The construction of the development will result in the placement of fill in 2.70 acres of exceptional Tennessee Waters (ETW)
1900 feet of riverfront walkway, 2146 feet of bank stabilization, 5240 total cubic yards of material riverward of the existing

PLACEMENT OF FILL IN 0.13 ACRES OF WETLAND

The overall project includes the installation of a gravity sewer collection system and pump station for The Runway Centre
applicant proposes to encapsulate 65 linear feet of an unnamed tributary to Mill Creek. This culvert length includes wing walls

Safety improvements along SR-33 and SR-71 with 362 feet of impact to three streams and 0.15 acre of impact to three wetlands
Placement of fill in 1.22 acres of wetland, 266 linear feet of stream and one 40-foot road crossing

Bank stabilization totaling 215 feet along an unnamed tributary to Piney River

widen and improve State Route 317 from Old Lee Highway to SR-321 involving impacts to streams and wetlands

construction of an SIA in from US 72 in Fayette County resulting in 65 feet of stream impact and 1.76 acres of wetland impact
proposed dredging, launching ramp, and riprap associated with marina development

Realign and widen 1,310 linear feet of Lateral C of North Branch to establish habitat and contain flood flows

Bridge replacement over the Duck River along State Route 50. This application also includes the installation of four haul roads
Sevenmile Creek Dam Removal

30 feet of culvert extension and minor wetlands fill in support of improvements to the SIA serving Volkswagen of America
reconstruct 4300 feet of channelized reaches of Town Creek and Bailey Fork Creek and unnamed tributary to Town Creek

Upsizing existing wastewater pumping station, force main, and gravity sewer at Unnamed Intermittent Tributary to Stoners Creek
Infrastructure improvements including a 16-foot culvert extension along Middle Creek, a 40-foot bridge crossing over Stoners Creek

install 460' of head cut repair on Lateral D and unnamed tributary of the Wolf River

Mass grading, drainage, erosion control. Stream Relocation for Siting of Ceramics Factory at Industrial Park of Unnamed
700 feet of bank stabilization along the Duck River

construction of a retaining wall

Placement of fill in 2.46 acres of wetland

225 feet of bank stabilization and stream fill along an unnamed tributary of the Wolf River

Stream Restoration -Sinkhole repair

proposing to impact of seven (7) streams, and three (3) wetlands. Stream impacts total 327 linear feet of stream loss and
Bank stabilization approximately 550 linear feet along one bank of the Buffalo River

Proposed mixed use development, Permanent stream impacts to STR-1 will total 465 linear feet of encapsulation with a
requesting coverage for 225' of rip rap armoring of shoreline

Construction new raw water intake and withdrawal of up to 18 mgd drinking water

Modification of NRS 15.107. Replacement of 200 feet by 20 feet of existing asphalt boat ramp with concrete at Boone Reservoir

The Applicant is planning to develop the approximately 21.09 acres Subject Property with 136 residences and future commercial development along 1,390 feet of stream at seven sites in Martin Branch and Clear Fork Creek.

Boat ramp construction

Road widening and extension

Clearing, grading, stream and wetland fill associated with the construction of CCR landfill

EWP streambank stabilization, 1,350 feet on the Riverfront Park to be stabilized and 553 feet on Bullard Ford Road.

Reapplication of NRS15.103, work remaining includes 222 linear feet of riprap along STR-5 as covered in the existing permit

Commercial instream gravel excavation

Commercial instream gravel excavation

Bank and stream stabilization to stop bank erosion and protect exposed waterline

The authorized impacts include altering 645 linear feet of a tributary to Lookout Creek through encapsulation and fill for

Installation of approximately 7.8 miles of waterline with 9 open trench stream crossings and a bore under the Sequatchie

Installation of 7.1 miles of optical ground wire including structure replacements

stabilize 243 feet of river shoreline with rip rap and build a 15'x75' concrete boat ramp

Approximately 24,000 linear feet of stream restoration along thirteen streams & wet weather conveyances and 55.79 acres

The applicant has identified unavoidable impacts a jurisdictional stream (359 FL) and a wetland (0.56 acres).

The length of Stream 001 within the project area (currently 951 linear feet) would

be fully encapsulated. WWC e001 would be armored and relocated affecting 736 linear feet of its channel

Impacts to 10 streams and 16 wetlands to accommodate roadway improvements along State Route 462

A 70 foot extension of two (48-inch and 60-inch) culverts within Silver Springs Branch to construct a school playground.

2.31 acres of permanent wetland impacts and a 100-ft road crossing of a stream associated with the construction of the 1 Emergency Slide Repair

The authorized work includes the use of explosives (blasting) in proximity to surface waters at five locations, totaling about

Removal of 3 trees that have breached the dam, dredging of 490 cubic yards of sediment, placement of a pond liner, and

Approximately 650 linear feet of riprap stream bank stabilization and establishment of riparian forest buffer

EWP approximately 175 feet of the SR 156 roadway washed away

Remove trees, gravel, and debris from creek overflow area 400 x 50 feet

In order to correct the monitoring issues a reissuance and modification of the permits will be necessary to complete the project

The relocation of 1,096 linear feet of stream in order to allow the development of a warehouse, access drives, and parking lots.

Stabilize 607 feet of TVA owned residential access shoreline using natural stone boulders, creek stone/rip rap, native vegetation

Permanent impacts resulting from residential development including 291.5 additional linear feet of encapsulation and 14

TDOT proposes replacement of the existing, deficient drainage structure along Owl Hollow Creek (STR-1) and State Route

The proposed project would impact three wetland areas for a total of 0.51 acres

Approximately 367 lf of bank stabilization using a combination of toe protection and live stake plantings. Temporary construction

Fill an existing 0.27 acre wetland to grade site for use as a residential development and replace degraded storm water culverts

Impacts to 2,003 feet of intermittent to perennial streams and 0.795 acre of wetlands.

Project proposes to fill 0.87 acres of wetlands and 71 linear feet of stream to develop a business park.
 installation of 48" steel casing pipe with prefabricated steel headwalls via jack and bore for approx. ____ LF of disturbance
 A total of 0.48 acres of moderate resource value wetland will be impacted by the placement of engineered fill for the corridor
 Chilvers Properties, LLC proposes to fill 0.12-acres of wetland, install a five-foot by five-foot spring box, and encapsulate
 Development of a regional truck center. The applicant proposes to impact (fill) 0.44-acre of wetland and 56 linear feet of
 7.16-mile portion of a proposed pipeline project occurring within Shelby County, TN impacting several wetlands and streams
 Included within the project scope is the crossing/impact of five streams and three wetlands
 Proposed projects includes to restore and stabilize approximately 2,230 linear feet of Sandy Creek.
 Final phase of The Reserve Subdivision, impacting approximately 3.47 acres of wetland
 Stabilize shoreline by means of soil pinning and shotcrete retainer
 CSX Proposes to replace the existing linear bridge structures at milepost 00F 367.8, 368.0, & replace bridge at 368.2 with
 The applicant proposes to construct a mixed-use development that will require impacts to 2.4 acres of wetlands.
 TDOT is proposing to construct a bypass around the City of Newport in Cocke County, Tennessee

This project is proposed to impact approximately 160 linear feet of intermittent
 stream and 0.025 acres of wetlands,
 Emergency Repair Project - Slope Stabilization on SR-332 at LM 2.40
 The project consists of installing a pump at three separate locations within Cheatham Lake WMA to create seasonal water
 Construct a 2.78 mi x 12' public greenway and an associated access road on retired rail bed impacting approximately 0.28
 Proposed single lane ramp for boat access at Sequatchie River, with associated access drive and gravel parking area
 proposes 600 feet of bank stabilization through the use of rock riprap and riparian vegetation and the installation of 6,50
 Encapsulate & eliminate 328 linear feet of stream channel
 Bridge Replacement- Stream encapsulation, stream relocation, wetland fill, and bank stabilization
 gravel dredging and road crossing
 Stream and Wetland Alterations
 harbor channel maintenance dredging
 construct a 46,192 square foot pond by impounding approximately 295 feet of an unnamed tributary to 1st Creek with or
 Construct raw water intake with a maximum intake of 2 million gallons per day (MGD) along Center Hill Lake
 installation of 473 of culvert and relocation of 1,050 ft. of stream into 858 ft. of constructed channel
 impact a total of 7 streams and 4 wetlands through encapsulation and deposition of fill material in order to construct a new
 wetland and stream impacts
 alter 5 streams and one wetland in order to widen SR-36 from SR-354 (Boone Avenue) to SR-75
 stabilize 550 feet of eroding stream bank using rock rip rap and plant a buffer with native vegetation according to NRCS d

Site #1: Rip rap both banks (270 ft per bank.)
 Site #2: Rip rap both banks as follows: west bank 75 ft of treatment, and east bank (next to road) 150 feet.
 Project #38004-1213-14 PIN #102232.00 SR 19 Brownsville Bypass construct from east of SR 87 to SR 76 South of Browns
 withdraw water at a rate of approximately 0.22 cfs, water withdraw would cease if creek flow falls below 3.5cfs.
 install two gravity sewer line crossings
 directionally bore a sanitary sewer line beneath McCutcheon Creek. This is line is in addition to previous sanitary sewer li

 Launching Ramp at Lower Hatchie National Wildlife Refuge
 Enterprise South Industrial Park (ESIP) Regional Stormwater Feature - Stream/Wetland Restoration at Poe Branch
 Sewer Lagoon - Wetland Fill/Excavation at Cumberland River
 dredging accumulated gravel from a large bar in Flynn Creek along Dry Fork Road
 The applicant proposes to install a 3-sided slab bridge over 52 linear feet of Mud Creek, an 8-inch gravity sewer line and
 remove the concrete debris of the relict Browns Mill Dam in the East Fork Stone's River
 The restoration and enhancement of 4,600 linear feet of Chilogatee Branch Stream and 754 feet of 4 unnamed Tributaries
 Roadrunner Market #124 - Installation of Open Bottom Box Culvert over section of Unnamed Trib to Little Lonesome Creek
 withdrawal water for industrial process from the Nolichucky River at mile 20.8. Includes construction of an industrial pro
 Widening SR-15 from Fire tower Road to west of Bigbee Branch
 Project #06007-1241-14 PIN #107386.01 SR-311 New Interchange Between I-75 Exit 20 and SR-2 with Multiple Impacts
 continue permitted water withdrawal from Salt Lick Creek
 relocate two streams, install an outfall, and cross stream with gas line
 Emergency Road Repair and Stream Bank Stabilization
 construct State Route 29 from SR-61 near Harriman to North of SR-328
 The alteration of 0.16 acre of wetland and 943 linear feet of an unnamed tributary to Popular Spring Branch.
 The construction of a proposed tire manufacturing facility shall require the alteration to 1,575 linear feet of an unnamed
 The placement of fill in 0.13 acres of wetland
 placement of fill in a 0.48 acre wetland and a 1.65 acre wetland
 Placement of fill in 0.26 acre wetland, a 1.28 acre wetland, a 1.66 acre pond and a 125-foot arch culvert stream crossing.
 Proposed culvert replacement with approximately 150 LF of stream relocation, one gravity sewer line crossing and one w
 channelization of 199' of stream to accommodate parking lot expansion
 install two culverts and associated rip-rap along two stream channels, relocating 82 feet of STR-1 and install two span bri
 proposes to fill 0.929 acres of wetland, culvert 3 tributaries to Arrington Creek for 162 linear feet, and install utilities usir
 replace the existing bridge on James Buchanan Drive over Anderson Branch,
 Expansion of existing gravity sewer with one crossing of Varnell Creek and one crossing of an unnamed tributary to Varnell

construct 2.422 miles of I-69 from South of SR 3 to South of SR 5 including impacts to streams and wetlands

construct 5.01 miles of two new lanes along SR 32 with a total of 150 feet of stream impacts and 0.03 acre of permanent
 conduct road widening along SR 320, in Hamilton County, that will impact 1,452 linear feet of stream and 0.41 acres of w
 encapsulation of 209 linear feet of an unnamed tributary to Friar Branch
 Construct and realign a segment of Vance Tank Road along SR 358. Impacts will consist of 0.231 acres of wetland fill and
 Shoreline excavation and retaining wall to add rowing lane to rowing course.
 The applicant proposes to install a 30" CMP that will encapsulate 160 linear feet of and unnamed tributary to Middle Cre
 placement of fill in 0.35 acres of wetland
 reconstruct, realign and widen 1.731 miles of State Route 10 from south of Goose Creek to State Route 52 near Lafayette
 wetlands fill 0.121 acres, spring channel relocation

boat ramp with dredge and fill

To restore approximately 3,100 linear feet of South Cypress Creek and 15.6 acres of wetland enhancements.

An approximately 0.14-acre moderate quality wetland will be filled for a Speedway filling station.

TDOT to expand ITS SMARTWAY system to include 18 CCTV cameras, 8 DMS, and 4RWIS, total proposed length of roadway

The Tennessee Department of Transportation (TDOT) proposes to repair an eroding stream bank using 125 linear feet of Slope stabilization for I-40 WB near MM 342

Eroded streambank will be stabilized with partial bank revetment and bio engineering totaling 460 linear feet

Boat Ramp (12' wide x 30' long) on private residence on French Broad River. Rip rap on either side of ramp (max. width 6

stabilize 835' of streambank at 2 sites (site 8 and 9) using resloping, boulder toe protection, and riprap jetties

Crossings for access to residential areas within the original Westhaven subdivision Master Plan footprint. The 60 LF S57 c

Minor Dredging for floating doc replacement and installation of 2 pipe bents for conveyor bridge hoist structure.

Construction of a seepage berm to prevent damage to the mainline levee

Replacement of failed concrete lined channel: 240' wall and bottom sections

Project proposes to relocate 310 linear feet of stream to the south to allow for construction of a turn lane

This project is to fill a total of 0.48 acres of wetlands to allow construction of a 398 unit apartment complex on the 19.9 a

Widening SR-15 from Fire tower Road to west of Bigbee Branch

replace railroad tie seawall with concrete wall

Stream and wetland mitigation bank (restoration, enhancement, and re-establishment)

Stabilize 500 linear feet of eroded stream bank along the Buffalo River.

The permittee is reconstructing the Jamestown Municipal Airport runway as well as relocating the taxiway.

Relocate the channel to the east perimeter of the lot to facilitate construction of two buildings

Fill 0.27 acres of low resource value wetland and encapsulate 116 linear feet of a wet weather conveyance to install an a

Widen Blair Branch Road and relocate a portion of J. Bivens Road to tie into Blair Branch Road before the intersection wit

Streambank stabilization with rock and bio engineering on knob creek

Addressing lake bank erosion through the use of approximately 1,785 linear feet of large angular riprap stabilization.

Approximately 11,360 LF of stream restoration along nine streams and 49.6 acres of wetland restoration

Previously highly altered and degraded streams will be relocated out of building footprint and restored to higher quality

Education campus that will include a high school, middle school, elementary school, and sports facilities

Installation of 18.5 mile 161-kV transmission line. This project spans 37.44 acres of wetlands requiring the conversion of :

The City of Collegedale proposes unavoidable temporary impacts to 0.60 acres of wetland and 103 feet of total impacts in

withdraw a maximum of 14.4 million gallons per day from the Hiwassee River at River Mile 16.7

commercial gravel removal

105 Lot, 42-acre residential subdivision with 0.43 acres of wetland impacts (fill), culvert encapsulation of 60 feet of a WW

Widen Jefferson Pike from SR102 to SR840 with 98 feet of stream impact and 1.017 acres of impact to six wetlands

Creation of a new commercial building and filling of low quality wetlands.

Overall, the SSMP will permanently protect 7.5 miles of stream habitat.

Proposed commercial development consisting of two buildings and associated parking on approx. 78 acres

Water Withdrawal - City of Franklin - Water Treatment Plant at Harpeth River

Realignment of outlet and removal of culvert

Armoring stream bed and banks for 66 feet, encapsulating 263 feet of stream with bottomless culverts, encapsulating 17

Combination of revised TVA Applications in Chickamauga Reservoir submitted in past year for a total of 11,250 feet bank

This process will include the fill of approximately 0.28 acres of open water pond and approximately 0.71 acres of existing

Emergency Repair slope stabilization

Restoration of 12,126 linear feet of intermittent and perennial streams for a Stream Mitigation Bank

Stabilize 430 feet of streambank using rock jettys along with rock stabilization

Culvert of 1,185.52 feet of concrete-lined channel located between the lanes of New Allen Road

Approximately 575' of streambank and grade stabilization upstream side of Corby Bridge Road.

Approximately 4,285 linear of stream restoration and creation along two unnamed tributaries to West Fork Drakes Creek

Restoration, Reestablishment, and preservation of Mud Creek and its Unnamed Tribs.

The Modification and Expansion of the I-75 and I-24 interchange with 347 feet of impact to two streams and 9.38 acres c

The applicant proposes to fill 0.33 acres of an isolated pond to facilitate commercial development of a hotel.

Hotel development and fill of 336 feet of an unnamed tributary to a wet weather conveyance to North Creek

896' of riprap bank stabilization at four sites

696 feet riprap to repair stream banks that are also road embankments

Dewatering and fill of an inactive limestone quarry with a ponded area of approximately 12.2 acres and place fill materia

Reroute existing concrete lined and box culverted channel through a new four-sided box culvert to allow for new building

0.31 acres farm pond fill to allow construction of warehouse distribution center.

Installation of a 10-acre, 3.18 megawatt photovoltaic solar array within the existing Moccasin Bend Wastewater Treatme
PRM, South Seward Hills Branch & Unnamed tributaries near FlyPark/Trinity Elementary School.

Reconstruct and widen SR-60 from North of I-75 to SR-306 with 1.966 acres of impact to three wetlands and 904 linear fe

relocation of 405 linear feet of an unnamed tributary to Morgan Branch for the installation of a turn lane and additional s

Construction of Industrial Access Road Serving Denso with 551 feet of impact to three streams and 0.058 acres of impact

stabilization of approximately 3000 feet of riverbank using a boulder revetment

Widen SR 33 at the intersection of England Industrial Road and Lynch Lane

impact to 395 linear feet of an unnamed tributary to Frey Branch and 0.65 acres of an unnamed wetland

Install two rock buttresses to along Peyton Creek to stabilize the stream bank and roadway slope along SR-80

Road crossing through wetlands for devel. of subd. placement of fill in 0.3 acres of wetlands

Grading and drainage improvements, construct new access road, and stabilize channel at Millington-Memphis Airport

400 ft. of toe armoring along the French Broad River

Develop a multimodal transportation terminal along the Cumberland River (Cheatham Lake) including maritime, truck, an

200' of riprap bank stabilization, channel bed excavation, filling in a reach of re-routed Dry Creek channel

Encapsulate 34 feet of stream to accommodate a parish life center

Streambank Stabilization using rock rip rap revetments on 8 sites

Widen I-40 from east of SR-5 to SR-1

Remove creek rock from rock bar to be utilized for mud control in barnyard and road to barn

Slope lake bank, build a retaining wall with steel H-Beams and Reinforced concrete, put down fiber mat, back fill, cover w
bank stabilization for 660 feet using rock toe and bio engineering the slope

Culvert encapsulation of 29 LF

Bank stabilization and 3,420 foot buffer

TVA proposes to construct Phase 2 of the Peninsula Disposal Area coal combustion residual landfill and associated borrow

Project proposed to fill 2.31 acres of wetlands to allow for a residential development.

Approx. 600' of channel stabilization

fill and armor an area of eroded shoreline for a length of about 70 feet and a maximum of 20 feet lakeward. This fill is to

Construct a facility adjacent to Bass Pro Shop. Currently, the project is confidential. Fill 0.095 of an ETW, mitigate with 5.0

Project proposes to remove a 0.33-acre pond to allow for construction of a residential development.

Replacement of Bridges on I-24 at Germantown road, LM 12.08 and belvoir ave, LM 12.59

The U.S. Army Corps of Engineers, Nashville District (Corps) proposes to perform an emergency dredging operation approach a 3-sided box culvert crossing to new parking lot required by City of Brentwood as part of church expansion. Approx. 110 Feet of shoreline stabilization with rip-rap per TVA regs as applied for in Section 26a permit. Unavoidable impacts associated with the planned construction of a new System Operations Center and Technical Support installation of fiber optic cable with 20 stream crossings in the Holston and Lower French Broad watersheds.

The authorized impacts include stabilizing approximately 275 linear feet of streambank along Manskers Creek.

An industrial complex is proposed to impact two WWCs, two intermittent streams, and three wetlands.

Completion of remaining activities listed in NRS14.086

Alteration of a 0.55-acre wetland and impacts to 100 linear feet of stream for development of residential housing.

Stream and wetland mitigation bank - restoration of 43.59 acres site to include the restoration of 27.81 acres of wetlands.

Installation of approximately four miles of new sewer lines

install an 18" HDPE treated effluent force main from intersection of Jamestown Rd and HWY59 to the Mississippi River, and

Improvements to Genesco Parkway to provide improved industrial access to the existing site for Project DeLorean

Construction of a process water basin and associated outfall structure for treatment and discharge of plant waste waters

Restoration of approximately 19.19 acres of a headwater slope wetland.

2740 feet of shoreline riprap armoring, including 80 feet of stacked gabions

relocation of 349 linear feet of one stream to accommodate residential development (233 of which is encapsulated current

Construction of a parking lot over a 0.25 acre low resource value wetland. Grading and drainage within 30 ft buffer area

150 ft rip-rap bank stabilization on both stream banks and placement of Energy Dissipator (70 ft L x 39 ft W) at outlet of effluent

Fill of 0.49 acres of wetlands for a 68 acre business park.

restoration, enhancement, and preservation of approximately 18,180 linear feet of 20 streams and wet weather conveyances

Maintenance dredging of boat docks for total of 3,662 cubic yards of material.

Installation of Box Culverts (65' long), wetland fill of 0.27 acres, and a road and utility line crossing

Remove concrete lining and move stream, increasing stream from 231 lf to 310 lf.

Impacts to 0.02 acres of emergent (PEM) wetland, 1,140 feet of intermittent stream, and 280 feet of WWC/ephemeral stream

Widen SR 115/ Alcoa Hwy between I-40 and Cherokee Trail Interchange.

Construction of Phase 7 of Wolf River Greenway in Memphis with 0.5 miles of multi-use trail, including one bridge and 8 miles

Construction of a two-lane bypass

riprap revetment extending for 2.4 miles of levee

Filling of 0.38 acres of wetlands/ponds

Construction of a spring house to collect spring water and a rock lined channel to convey the water to the outfall pipe.

Construction of a new alignment for SR 317 with 2,603 linear feet of impact to nine streams and 3.86 acres of impact to wetlands

Widen SR 63 from near Myers Lane to near Frontier Road/Woodson Lane.

State Industrial Access Serving Project Phoenix (Tyson Foods) Tyson Boulevard

Hydraulic maintenance dredging of 3,000 cu yards of sediment in the eastern end of the lake.

Remove 200 linear feet of trees and place rip rap for bank stabilization

Continued withdrawal of up to 1.94 MGD via previously constructed intake

Removal of gravel from creek to be used for farm road.

Install 60 foot riprap apron downstream of the culvert.

Fill 8.10 acres and temporarily impact 1.68 acres of jurisdictional wetland.

Encapsulation, and extension to current box culverts and cross drain for Walton Ferry/Old Shackle Island Road. Includes stream

Removal of sediment buildup in eleven lakes in Fairfiled Glade Community Club

Stream channel realignment.- Payton Ln.

Excavation of boat channel near docks where water has become too shallow to allow boat access.

Interchange improvement I-40 and State Route 9 with 0.139 acres of wetland impact and 72 linear feet of additional stre

Construction of driveway from shore to winter pool

Stream Bank stabilization and Grade Control to protect existing retaining walls supporting parking lot.

Impact Fall Branch for a total of 121 linear feet and permanently impact 0.063 acres of wetland while improving 0.8 miles of SR-93.

Widen State Route 28 with 3,811 linear feet of impact to 13 streams and 1.275 acres of impact to 10 wetlands

In-lieu fee wetland mitigation project

In-lieu fee wetland mitigation project located at two sites.

withdrawal of up to 31 cubic feet per second (cfs) from Duck River

Restoration of streams and wetlands within the adjacent floodplain of the Middle Forked Deer River

Emergency Permit - Levee repairs with approximately 2,900 ft of stone rip rap

Widen from Pyburn Drive to SR-226 (Airport Road)

430 feet of full bank riprap armoring. Repair previous stream bank stabilization project under completed permit NRI160 enhancement and preservation of 21.57 acres of wetland

Installation of approx. 11,000 linear feet of a diversionary sewer impacting 1.12 acres wetlands, 55 lf streams, and 374 lf

Relocation of Ball Camp Pike with culverting three perennial streams, relocation of two of the perennial streams, and fill placement of fill in 0.59 acres of wetland

Culvert crossing impacting approximately 60 feet of stream

Filling of a 0.17-acre impound wetland

340 linear feet of riprap revetment

Construction of a 108 bed veterans' home on a previously disturbed site.

Dredging and installation of watercraft access areas, installation of parking pad, loading zone, elevated walkway, and kay

Construction and grading for Cedar Farms Village residential development. Fill of 0.05 acres wetland.

Proposing to construct a large-scale residential development on an approximately 520-acre site. The proposed developm

Installation of 37,000 ft of 12" ductble iron water line along Crisp Springs Road, Short Mountain Road, John Oliver Road, Bald Knob Road, Fuson Road, and Dibrell-Lucky Road with 3 stream crossings by open cut

Install ephemeral drains to area wetlands

fill of a 0.45 acres of wetlands to accommodate residential development

Dredge within Pages Branch

Construction of rams, high water access structures, wider roads, staging area for military equipment, and outlet ditches fill 1.38 acres of wetland and 97 linear feet of stream in order to construct a private, 12- acre impoundment

Removal of gravel for use to improve road ways on farm.

Widen I-40 from 4 lanes to 8 lanes east of SR-109 to east of I-840. Entails crossing/impact of 6 streams including 2 ephen placement of fill in 2.2 acres of wetland

Multiple Stream crossings, one wetland crossing for sewer line upgrades
 eleven creek crossings along with parallel alignment near the banks of the creek
 Eroded streambank will be sloped to a 2:1 slope and stabilized with rock riprap underlain with geotextile fabric.
 Installation of 2 stream crossings (cumulative 275 linear feet) and 2 sewer line crossings
 construct a v-weir dam and install a water wheel for irrigation of farm crops
 300 ft expansion of current road crossing culvert
 Repair existing 150 feet of revetment and 5 jetties with additional 340 of riprap revetment
 construction of a new outfall with 0.3 acre of wetland impact and 25 linear feet of rock riprap along Old Hickory Reservoir
 Eastern transmission water lines, multiple crossings, Little Harpeth River
 Residential development of 394 lots on 125 acres with impact to 2.18 acres of wetland
 Placement of Energy Dissipator (50 ft L x 71 ft W) at outlet of existing culvert
 0.45 acre impact of 2.38 acre wetland for development of Quality Inn
 Multi-family housing development with proposed dredging of approximately 2,700 cubic yard of sediment to deepen existing
 New road alignment of I-69 impacting 2537 linear feet of stream and 2.556 acres of wetland. Mitigation through TSMP at
 Water quality improvement and ecological enhancement of East Lake Pond
 0.86 acre wetlands fill in addition to previously permitted 0.2 acres
 ROW construction for a new access road serving Project Falcon (Mohawk Industries)
 Encapsulate 1,200 feet of stream channel with mitigation of 1,800 feet of new channel at Omega Ranch - 600 feet daylight
 Business park construction impacting 2 WWCs and 5 small wetlands, totaling 0.14 acres.
 Commercial Instream Gravel Mining
 construction of road cut and launching ramp in banks of Duck River
 3 road and utility crossings, a sewer crossing, 2 pedestrian bridges and the relocation of 710 linear feet of stream for the
 impact to 1.74 acres of wetland to accommodate industrial expansion
 Restoration of 2,600 linear feet of canal to 6,100 linear feet of meandering channel
 Stream restoration activities on 50,000+ linear feet of White Oak Creek and tributary streams within the TWRA White Oak
 Relocation of 5,000 linear feet of Cane Creek away from railroad embankment and 2 bridge crossings
 Fill 0.25 acres of wetland and 0.27 acres of open water

Fill additional 0.60 acres of wetland for site development in addition to 0.18 acres of previously permitted fill to cumulative
 placement of fill in 4.02 acres of wetland for residential development
 Construction of 120 foot retaining wall
 New access road involving bridge over and stream relocation for STR-2 and culvert over STR-3. SR-247 realignment near
 Fill 0.21 acre of wetlands associated with the development of the Three Rivers Development. Compensatory mitigation is
 Proposed residential subdivision consisting of 58 lots on approx 15 acres
 3 bank stabilization sites along Brier Creek.
 Permanently impact 0.136 acres of wetland, 120 linear feet of stream, and temporarily impact 1.33 acres of wetland for
 install seepage protection measures and repair levee slides
 Proposed 170 dwelling expansion south of Westhaven Subdivision
 removal of debris and excavation of channel caused by failure of road slope. Upon excavation streambed and banks will
 1,350 linear feet of riprap bank stabilization
 Replace/repair existing failing retaining wall at public use area
 fill of 1.15 acres of wetlands and encapsulation of 235 linear feet of stream for a mixed use planned development
 fill of 0.35 acres of wetland and encapsulation of 121 linear feet of one stream to accommodate residential development
 Plans to develop a soil borrow area on TVA-owned property including a stream crossing for access
 encapsulate additional 139 lf of stream to realign interchange into a divergent diamond interchange from a diamond interchange

Fill 0.32 ac. of wetland and encapsulate 187 linear feet of a Trace Creek tributary for development of Stephens Valley. Are proposes to impact three streams and two wetlands. Total impact to streams is 274 linear feet of culvert and 69 linear feet of stream, span 220 lf of stream, and fill 3.1 acres of wetland. Wetland mitigation will occur on-site. St replace existing 237 foot X 25 foot 5 span steel truss bridge with a 280 foot X 31.25 foot 3 span concrete bulb tree bridge. Fill 123' of Friar Branch and replace with a 104' channel. Mitigation includes enhancement downstream.

Replace bridge and impact an additional 182 linear feet of stream impacts for SR 115 (Alcoa Hwy) road widening Stream & wet weather conveyance restoration and enhancement associated with the reclamation of abandoned mine la Replacement of two existing bridges on State Route 196 and improvement to the existing road safety between the two b Fill 0.43 acre wetland for residential development

construct a span footbridge over a tributary channel of the ONRW portion of the Little Pigeon River

Installation of 9, 12' wide in-stream jetties. Total hard armoring = 108 LF

upgrades to State Route 56 with 1,608 feet of impact to four streams and 0.359 acres of impact to three wetlands

Continued ARAP Monitoring

170 linear feet of stream encapsulation of an unnamed tributary to Candies Creek and 0.177 acres of wetland fill to two t Encapsulate 731 lf of stream, convert a 0.2 acre pond to a bioretention basin and fill a 0.05 acre pond.

placement of fill in 0.43 acres of wetland

encapsulate 201 lf of stream, fill 0.83 acres of wetland, fill 2851 lf of wet weather conveyance and install pier span bridge placement of fill in 0.29 acres of wetland

private use instream gravel mining

bank stabilization: riprap and bioengineering

proposing to restore and enhance 3,990 linear feet North Creek and an unnamed tributary to North Creek, a tributary to 17.7 miles of roadway improvements that will impact 2 streams and 11 wetlands. 8.52 acres of permanent impacts to we Impact approximately 356 feet of stream. 256 lf will be filled and replaced onsite and 100 lf will be enhanced.

Backfill the old spillway area. Volume of fill = 3640 cubic yards. 0.45 acres will be filled.

PLACEMENT OF FILL IN 1.2 ACRES OF WETLAND

820 linear feet of stream bank stabilization using both rip rap revetments and jetties. 435 feet of which will be half bank i Gravel dredging in excess of 50 cubic yards

construct notches in two existing dikes , using land based construction equipment, to restore fish passage and habitat in 24 crossings usings open cut method to install a 12 inch gas line. Last day of PN July 29.

placement of fill in 0.824 acres of wetland

Widen existing slab box bridge on Lafayette Road to accomodate new travel lanes. New box bridge will impact a total of : install an irrigation line crossing a Misc Tribs to Station Camp Creek for phase 11 of Millstone

Streambank stabilization on Bradley Creek. 6 different sites totaling 495 feet of streambank. Riprap, slope 2:1, and geote encapsulate 50 additional linear feet of stream and install rip rap at outfall to widen SR 71 from a four lane to a five lane

107-feet of impacts to stream 5, completion of 467-feet of impacts to stream 5, completion of 176-feet to stream 1, 76 feet of buffer planting on stream 5, removal of an existing 18-foot culvert at stream 1, remove asphalt rubble at stream 4.
